UPOZNAJTE LJUPKU BRAČKU KOLIJEVKU KULTURE
Embrace the cradle of culture on the island of Brač

Zovu ih vratima Brača, a ona su, zapravo, njegovo istinsko kulturno srce. Potraga za selačkim kulturnim i outdoor poslasticama u vlastitoj režiji izvrсна je ideja za odmor u predsezoni, a mi znamo odakle treba početi!

They call them the "gates of Brač", while they are, in fact, this island's true cultural heart. A self-directed search for rural cultural and outdoor treats is a great idea for a pre-season holiday, and we know precisely where to start!

MALI PALAC I JEDNA UISTINU IMPOZANTNA KATEDRALA.

Prvo što ćete zamijetiti u idiličnoj vizuri samog mjesta Selca je monumentalna građevina u neoromaničkom stilu - crkva Krista Kralja plod je naročite kulturne klime koja je početkom 20. stoljeća formirala Selca, ali i umješnosti selačkih kamenoklesara. Južno od crkve pronađite još jedan dragulj – Palaču Štambuk poznatu i pod nazivom ‘Mali Palac’. Oduševite se njenim uistinu jedinstvenim stilom gradnje (poput sljublivanja kamena bez fugal!) i pitoresknim detaljima koje je izradio Ivan Štambuk, jedan od najboljih selačkih klesara i umjetnika!

A LITTLE PALACE AND A TRULY IMPOSING CATHEDRAL...

The first thing you will likely notice when it comes to the idyllic view of Selca itself is the monumental building constructed in a stunning Neo-Romanesque style - the Christ the King Church is the result of the special cultural climate that formed Selca back at the beginning of the twentieth century, as well as the skill of local stonemasons. Just south of the church, you'll come across yet another jewel - the Štambuk Palace, also known as "Mali (Little) Palac". Marvel at its truly unique style of construction (like the joining of the old stone without actual joints!) and the picturesque details created by Ivan Štambuk, one of the best stonemasons and artists from Selca there ever was.

KUĆA OD 5 DOLORI

Početak siječnja ove godine na otoku Braču započela je izgradnja Interpretacijskog centra ribarstva posvećenom Mariu Puratiću. Smješten u blizini njegove rodne kuće u Sumartinu, Centar će prvenstveno posjetiteljima približiti značaj njegovih izuma te čuvati spomen na njegovu nevjerojatnu životnu priču.

THE HOUSE OF 5 DOLLARS

At the beginning of January this year, the construction of the Fishery Interpretation Center dedicated to Mario Puratić began on the island of Brač. The Center will primarily bring visitors closer to the significance of his inventions and preserve the memory of his incredible life story.

KILOMETRI OUTDOOR UZBUĐENJA.

Sva su selačka naselja međusobno povezana uređenim stoljetnim poljskim putevima idealnim za rekreativno bavljenje sportom, trčanje i hodanje, pa ondje možete prikupiti popriličan broj kilometara za Vaš trkački portfolio! One natjecateljskog duha oduševit će mogućnost sudjelovanja u utrci Brač run, koja će nakon trogodišnje pauze doživjeti svoj veliki povratak u lipnju, a otprilike 70 km biciklističkih staza, super ture e-bikeom, safari quadom, obilazak obližnjih uvala SUP-ovima, ili onih nešto malo daljih pravih robinzonskih oaza gliserom, baš kao i mogućnost igranja tenisa na uređenim teniskim terenima, pokrit će apsolutno sve potrebe ljubitelja aktivnog odmora! Sadržaja ima i za najmlađe goste, koji u ljetnim mjesecima hrle u školu futsala u Povljima, koja uživa iznimnu popularnost.

KILOMETRE AFTER KILOMETRE OF OUTDOOR EXCITEMENT...

All of the island's rural settlements are interconnected by well-maintained, century-old field roads ideal for recreational sport, running and walking, so you can accumulate quite a number of kilometres along them for your running portfolio! Those born with a rather competitive spirit will be delighted by the possibility of participating in the popular Brač run race, which, after a three-year break, will make its big return this June. With approximately seventy kilometres of bike trails, super tours on e-bikes, safari quads, a tour of the nearby bays on SUPs, or the chance to visit a few real "Robinson oases" by speedboat, not to mention games of tennis on the tennis courts, your needs will be well and truly covered if you're a lover of an active holiday.

PJEŠAČKA CJELINA KOJU SU ODOBRLI KULTUROLJUPCI.

No, i oni koji se odluče samo na šetnju svejednako će uživati u netaknutoj i izvornoj prirodi. Kružna turističko-planinarska staza Via Brattia (140 km) provjeren je hedonistički recept za istraživanje Brača koji uključuje najdragocijenije od našeg najvećeg otoka – poput pustinje Blaca, Zmajeve špilje ili pak klesarske škole. Nemojte propustiti slikovite selačke zaseoke i znamenita Povlja, mjesto gdje su pronađeni najstariji pisani dokumenti na hrvatskom ćirilicnom pismu. Osim što ondje možete kušati sjajna bračka vina, razgledajte starokršćansku baziliku iz 6. stoljeća s oktogonalnom krstionicom i rimskim spomenicima!

A PEDESTRIAN AREA APPROVED BY CULTURE LOVERS...

Those who would sooner opt to go for a walk will still enjoy the untouched nature of this part of the island. The circular tourist-mountaineering trail called Via Brattia (spanning 140 kilometres in total) is a proven proverbial recipe for really exploring Brač, as it includes the most precious trump cards held by this gorgeous Central Dalmatian island - such as the Blaca Hermitage, the Dragon's Cave or the local stonemasonry school. Don't miss out on seeing the picturesque little settlements of Selca and the famous Povlja, the place where the oldest written documents in the Croatian Cyrillic script were discovered. In addition to the fact that you can taste some excellent locally-made wines there, you can also see an early Christian basilica from way back in the sixth century with an octagonal baptistery and Roman monuments!

SUMARTINJANIN KOJI JE IZMIJENIO SVJETSKO RIBARSTVO.

Općina Selca nedavno su usvojila i idejno rješenje za spomenik zanimljive vizure jednom svom uistinu posebnom stanovniku. Riječ je o Mariju Puratiću, izumitelju ribarske naprave koloturnika, koja je omogućila brže i lakše izvlačenje mreža, i donijela takvu revoluciju svijetu ribarstva da je svojevremeno bila otisnuta i na kanadskim novčanicama! Spomenik će biti postavljen u Sumartinu i izrađen u kamenu, prepoznatljivom simbolu bračkog identiteta, a želite li pobliže upoznati lik i djelo znamenitog Sumartinjanina, posjetite Puratićeve dane koji se održavaju u Sumartinu krajem srpnja, a uključuju prigodna predavanja, feštu o riba i nastup live banda!

THE SELCA MAN WHO CHANGED THE WORLD OF FISHING...

Selca, famous for its abundance of monuments to various important personalities, recently adopted a conceptual solution for an interesting-looking monument to one of its truly special residents. We're talking about Mario Puratić, who made numerous technological advances in fishing, and was even the inventor of the power block, which made it possible to pull out nets faster and more easily. This Selca man brought such a revolution to the world of fishing that it was once printed on Canadian banknotes! His monument will be erected in Sumartin and made of stone, a recognisable symbol of the identity of this island, and if you want to get to know the character and work of this famous local man better, visit the Puratić Days event, which is held in Sumartin at the end of July. It includes lectures, a fish festival and a live band performance.
